

Lesson on The Stock Market
Note to Teachers

Grade Level - 7th grade and up.

Approximate time - 45 + minutes for the background questions of the lesson and more for the Stock Market simulation game.

Skills practiced - reading for information, fractions and other basic operations, as well as logical thinking.

NYS Standards covered - Operations, Number and Numeration and Mathematical Reasoning.

Note: This is a background lesson (actually a tutorial) on the Stock Market. The culmination to the lesson is to have students actually play a Stock Market Simulation game. Make sure you play the game first and make sure you know how you want your class to register. This is a good interdisciplinary lesson to do with Social Studies.
